

# Regions for Forest Types based on Smith et al. 2006 from Reforestation Communities Data File

**CLIMATE  
FORWARD** ▶

A Program of the  
Climate Action Reserve

Regional boundaries used for forest types eligible under the Reforestation Project Forecast Methodology V1.0 are based on those defined by Smith, J. E., Heath, L. S., Skog, K. E., & Birdsey, R. A. (2006). Methods for Calculating Forest Ecosystem and Harvested Carbon with Standard Estimates for Forest Types of the United States. Newtown Square, PA. <https://doi.org/10.2737/NE-GTR-343>. Forest types applicable to each region can be found in the Reforestation Communities Data File. Regional boundaries are also available as a GIS layer. Both files are available for download from the Reforestation Project Forecast Methodology page on the Climate Forward website at: <https://climateforward.org/program/methodologies/reforestation/>
